

MUNICIPAL ENGINEERING SERVICES

COMPREHENSIVE PLAN *Polk City, IA*

RESPONSIVE, PERSONAL SERVICE

For us, it's about more than just the project at hand—it's about building strong relationships with communities we have the pleasure of serving. Today, more than 40 years since our firm's inception, our founding vision of a client centric approach remains vital in our ability to provide daily municipal engineering services for 50 Midwest communities while maintaining successful, lasting relationships.

We understand the importance of resiliency and sustainability—these terms are more than just buzz words for our municipal engineering staff. The plans and designs we work on together today will be around for years to come.

DEDICATED EXTENSION OF YOUR STAFF

From allocating funds for infrastructure improvements to maintaining regulatory compliance and managing community assets, there's plenty to accomplish—but you're not alone. Our primary goal is to serve our clients in an authentic, honest partnership. Committed to the long-term success of our client communities, we put your needs first. We're skilled at nurturing strong relationships between city staff and community stakeholders, while taking all perspectives into account. Through attention-to-detail, we anticipate issues before they arise to keep our clients informed and minimize change orders.

As a full-service firm with a diverse team of over 250 professionals who address a variety of municipal challenges on a daily basis, we're prepared to help. Our team includes a mix of engineers, planners, GIS specialists, surveyors, and technicians to ensure you have the help you need no matter what comes up from day to day.

HOW WE CAN HELP

TRAFFIC & TRANSPORTATION

With budget and time constraints in mind, we overcome current transportation challenges and prepare a road map for the future to enhance your transportation network.

DRINKING WATER

To provide safe, reliable drinking water to the communities we serve, we prioritize and design supply, treatment, and distribution improvements.

WASTEWATER

We can assist with improvements for aging treatment and collection systems and the planning and design of new facilities for growing communities.

COMMUNITY DEVELOPMENT

Our team will review developers' plans including preliminary and final plats and construction drawings to ensure compliance with city plans, codes, and specifications.

PAVEMENT MANAGEMENT

By developing a financial strategy for pavement improvements, including rehabilitation, preservation, and reconstruction, we are able to maximize resource efficiency and ultimately save you money. We do this through data collection, organization, assessment, and maintenance planning using GIS technology.

CONSTRUCTION OBSERVATION

Up-to-date knowledge of materials, techniques, and technology guides us in verifying project compliance with plans and specifications. Use of cloud-based document management software helps us streamline project audits for expedited closeout and reimbursement.

STORMWATER MANAGEMENT

We can help you resolve drainage, flooding, and erosion issues from backyard swales to rivers running through your community.

CAPITAL IMPROVEMENT PLANS

To provide your community with a five to ten-year planning and fiscal management tool, we'll help you review all projects and prioritize them while identifying funding opportunities and creating a timeline for completion.

INFRASTRUCTURE STUDIES

Municipal utilities, treatment facilities, roadway networks, and public spaces represent a majority of a community's assets. We can help identify deficiencies in your infrastructure system and outline steps for improvement to protect community assets and maximize your investment.
